Comprehensive Mechanical Project Services

- **Project Planning & Organization**
- **Engineering Design and 3D BIM Modeling**
- **Construction Planning**
- **Commissioning & Re-Commissioning**
- **Forensic Engineering**
- **Revit 3D Modeling**

DMCSI provides Mechanical Engineering/Design Services focusing on Facility, Process and Manufacturing systems in retrofits, refurbishments, maintenance projects and new construction for a variety of Mechanical environmental/HVAC applications, process piping and plumbing design for commercial, industrial and multi-unit residential. Expertise in overall project planning for alignment of Scope, Schedule, Quality, Budget and Change Control/Monitoring. Experts in Value Engineering and Designing to Programming Requirements.

Production Capabilities: Production of design and construction drawings in Revit MEP 3d and AutoCAD 2d. We can provide drawings and specifications for bid documents or work closely with the CM/GC and Building Trade Contractors to provide Coordinated Construction drawings and 3d Modeling. We provide scheduling and procurement assistance EPC and CM projects.

Harold D. Cullick, PE, LEED AP Principal: Harold Cullick is a Registered, Professional Mechanical Engineer in Arizona, California, Colorado, Oregon, and Louisiana. He is a LEED Accredited Professional and a licensed heating, ventilating and air conditioning contractor in California and was a certified mechanical contractor in Florida for over 15 years. He graduated with a Bachelor of Science in Mechanical Engineering with Distinction from the University of Alberta. He has over 20 years experience in Mechanical Engineering and Design and an additional 10 plus years in construction project and design management. He has personally managed up to \$50-60M complete projects and over \$150M portions of billion dollar plus projects

Harold Cullick has experience in projects, large and small, over a wide variety of commercial and industrial applications during 20 years in consulting engineering. He has managed design/build projects as the Engineer and Project Manager. He has performed contract negotiations and material/equipment purchasing for Owners, engineering firms and mechanical contractors. He has experience in Startup/Commissioning for mechanical/HVAC systems for peak energy performance and operational stability. He has coordinated with the Developer and the Construction Management companies. Association with ASHRAE, AFE, NSPE, USGBC, NCEES.

We provide **Forensic** engineering services for evaluating facilities for cause/effect of system operational issues and failures. We provide Commissioning and Re-Commissioning services for optimum energy performance and energy conservation.
